

SUMITOMO PRECISION PRODUCTS CO., LTD.

News Release

April 1, 2025

Sumitomo Precision Products Co., Ltd.

Top Message

I am Tetsuya Tsurumaru, and I have been appointed as the Representative Director, President of Sumitomo Precision Products Co., Ltd. as of April 1, 2025.

Nice to meet you all.

I do not have a background with Sumitomo Precision Products Co., Ltd., as I have been appointed from an external director position.

Allow me to briefly touch on my background. I have been involved in the semiconductor industry for approximately 40 years. Initially, I was responsible for manufacturing process technology in semiconductor production. Subsequently, I was involved in factory operations and the management of a chip maker. The semiconductor industry is one of rapid changes, and my experience reflects that. In my role in management, my responsibility was to pave the way for the company's reconstruction and growth. In 2021, confident in the new structure's potential for success, I concluded my role and retired from the chip maker.

Sumitomo Precision Products Co., Ltd. was founded in 1961 and manufactures aircraft equipment, industrial machinery, and semiconductor-related equipment. The company has its origins in the production of aircraft equipment and, like the semiconductor industry I have been involved in, contributes to advanced technology industries. We are deeply grateful to our stakeholders, including our customers and suppliers, for their continued support.

Recognizing our position as a member of the "Sumitomo Group," I aim to further advance our efforts to build a company that contributes both domestically and internationally. Moving forward, I will share messages regarding our group's business content and direction in News as needed. I kindly ask for your continued support and guidance.

Tetsuya Tsurumaru Representative Director and President

Sumitomo Precision Products Co., Ltd.
